# WHAT WE DO

ELIGROUP's® core business is the repair, maintenance and installation of electric and electronic systems for the maritime industry.

**OPERATIONAL  
EXCELLENCE,  
PASSIONATE  
WORK AND  
CONTINUING  
INNOVATION**

# WHO WE ARE

ELIGROUP® is a leading Company in maritime maintenance, security and safety as well as integrated systems. ELIGROUP® has been serving the marine industry as an innovative, reliable and high quality system integrator, distributor, installer and after-sales service agent of marine equipment, technologies and solutions.

# WHERE WE ARE

ELIGROUP MENA is located at the bustling waterfront of Doha, strategically situated in the heart of the Arabian Gulf, but owes its heritage to our parent company in Naples, Italy.

It is a living port that experiences intense maritime traffic daily, with the departure and the arrival of large cruise ships, ferries and over 25 million tons of cargo.

**CONTINUOUS POSITIVE FEEDBACK FROM  
OUR CUSTOMERS IS OUR STRENGTH**

# SERVICES

## BOW THRUSTER

Planned periodic maintenance is essential to ensure the proper functioning of the bow thruster.

-  Isolation
-  Environment humidity
-  Bearing check
-  Hydraulic oil check
-  Electrical system check
-  Coupling

## GENERATOR AND SWITCH BOARD MAINTENANCE

Our company opts for a predictive generator and switch board maintenance strategy. Predictive maintenance, by means of measurements and analyses performed on machinery, aims at determining the actual operating conditions, both overall and concerning individual components, with as great a degree of reliability as possible.

## SHIP MAINTENANCE

Ship maintenance is performed by our specialists on ships that are docked or in operation at any port. The Eligroup® team are experts in electronics, communication, navigation equipment and Satcom solutions and our partners are certified by major Classification Societies.

## NEW BUILDINGS

The New Buildings division deals with all the executive stages of a production order, from the study and design phase to the end of the project. Skillfully attentive related to newest technologies, Eligroup® offers support in the design and implementation of electronic panels and systems, as well as main switchboards, fire detection systems and automation.

## GREEN SHIP SOLUTIONS

We are your specialized service provider for:

-  Ballast water treatment
-  Emission scrubbers

We can make your vessel compliant with the latest environmental regulations or increase her fuel efficiency.

## SHIP FITTING & FURNISHING

Eligroup® offers a full service of ship fitting and furnishing, from interior design to the supply of materials for naval, offshore and large yacht markets. We can provide technical surveys, general and detailed design, project coordination and semi-finished products, finished on site or pre-assembled to deliver a complete product at competitive prices.

# PRODUCTS

## INTERNAL COMMUNICATION

Eligroup has a wealth of experience in the production of state-of-the-art internal communication and general alarm systems. Our systems have been rigorously tested and have been installed on over 200 vessels, earning approval from the renowned RINA certification agency.

## FIRE DETECTION SYSTEM ON BOARD

Our fire detection systems on board use the latest technologies and today we compete with all producers, both technically and economically.

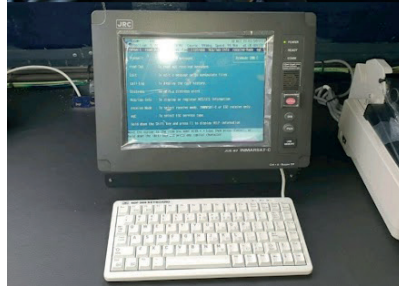

Every component is developed according to EN54 standards and the European MED standard in order to meet the requirements of the Classification Societies.

## NAVIGATION EQUIPMENT

Eligroup® provides flexible and innovative navigation equipment systems for the maritime industry.

Eligroup® designs navigation equipment systems such as bridge dashboards, system integration, installation and commissioning.

Our turnkey navigation equipment solutions are designed to meet IMO and class requirements, as well as your budget.

## NIGHT VISION SYSTEM

As a global distributor of Starlight night vision systems, Eligroup offers a range of solutions for use on high-speed craft, military vessels, megayachts and more. Our state-of-the-art cameras not only provide unparalleled clarity and detail in low-light conditions, but also offer flexible customization options with the integration of additional sensors and advanced software for observation and recording.

## CCTV SYSTEM

Video surveillance enables you to monitor operations on offshore sites and respond promptly to threats, alarms and other unforeseen incidents.

We can build a fully integrated CCTV system, providing you with high-quality pictures and complete coverage of your site, even at night and in harsh weather conditions.

## ULTRASONIC ANTI FOULING SYSTEM

Our hull protection system **ANFORA** is able to ensure the cleanliness and constant maintenance of the hydrodynamic performance of the hulls preventing almost completely the engraftment of animal and plant species that normally proliferate on the bodies immersed in seawater.

Everything is “reduced” to a significant reduction in fuel costs, as well as a saving in the costs of dry docking.
